

## Environmental policy Skandinaviska Gasprodukter AB

Skandinaviska Gasprodukter AB conducts business with high-purity gases, gas mixtures, gas equipment and design, install and provide service of gas systems.

We have high competence in the industry and a good understanding of the customer's needs for technical and cost-saving solutions.

The environmental aspects that we take into account are

- customers environmental requirements for products,
- if possible, sustainability work when choosing suppliers,
- regulatory requirements for pollutant products,
- handling and protection of products,
- expertise in gas use.

Through this policy, management and staff undertake to continuously develop the environmental management system through environmental awareness, environmental protection and compliance with binding requirements.
